## The company

The AMS GmbH was founded in 1972 by the name of AMS Seeber GmbH. In 1974 Stefan Imhäuser took the company over with four employees. Formerly being specialized on the production of welding machines we more and more concentrated on the production of metal interior fittings and metallic façades. Since 1999 the family business has been owned by Stefan Imhäuser and his sons Gregor and Thomas Imhäuser who lead the company today.

From the beginning we have been optimizing the professional use of metal in form and function and could expand our expertise and production technologies continuously.

Nowadays the AMS disposes of an original capital of more than 1 million EUR and employs more than 120 people who are our most valuable factor.

In the last few years our portfolio has been complemented by environmental technology e.g. air cleaning which will be another essential field for research and development in the future.

AMS products and services are sold all over the world either by our headquarters in Elkenroth or by our agencies.

AMS GmbH is a provider of products and services in the field of metal engineering. As a privately owned, medium-sized company with a good 40 years of experience and expertise, we offer custommade solutions and products in metal to our customers.

Our products are divided into the following ranges:

- Metallic interior fittings
- Air-pipe systems
- Metallic façades
- Kitchen ventilation technology
- Service windows
- Industrial services
- Plant components
- Furnishings + objects of art

Please find more detailed information on our homepage: [www.ams-mbt.de](http://www.ams-mbt.de)

**Year of foundation**  
1972

**Corporation**  
Incorporated Company (Inc.)

**Common stock**  
EUR 1,010,000.–

**Managing director**  
Dipl.-Ing./SFI Thomas Imhäuser

**Officers with procurement**  
Wolfgang Ermert (commercial manager)  
Gregor Imhäuser (manager branch Dessau)  
Rainer Schuster (technical manager)

**Property**  
36,000 m<sup>2</sup>  
**Production area**  
8,000 m<sup>2</sup>  
**Office building**  
550 m<sup>2</sup>

**Employees**  
120 +

**References**  
World-wide, quod vide reference list

**Representatives**  
Agencies in Germany  
and Europe

**Company fittings**  
Processing of thin sheet metal made of steel, stainless steel, aluminium, copper, brass

NC-plate shears  
for large sizes up to 3,000 mm  
NC-plate shears  
for special sizes up to 4,000 mm  
CNC-laser centre  
CNC-nibbling centre  
NC-folding press, 45 t lifting capacity  
CNC-folding press, 60 t lifting capacity  
CNC-folding press, 80 t lifting capacity  
CNC-folding press, 160 t lifting capacity

CNC-bending presses  
NC-sheet metal bending rolls  
with 3 rolls length 1,250 mm  
NC-sheet metal bending rolls  
with 3 rolls length 3,050 mm  
NC-sheet metal bending rolls  
with 4 rolls length 4,150 mm  
NC-profile sheet metal bending rolls  
NC-mechanical saws  
NC-double circular saw  
for mitric cutting  
"Sikken" machine

In addition all kind of welding machines  
for the processing of thin sheet metal.

**Organisation**  
The planning and organisation is effected  
by PPS and CAD/CAM systems.

**Surface technology park**

**Powder coating**  
Flow-spray-pretreatment-plant  
Cyclone and filter spray cabins  
A-type reverse stove furnace

**Longitudinal grinding plant**  
Automatic grinding plant for tubes  
diameter max. 1,800 mm and length  
max. 8,000 mm

**Glass bead blasting plant**  
For stainless steel only. Material up to  
length 8,000 mm x width 3,000 mm x  
depth 3,000 mm, work piece weight  
approx. 1,000 kg

**Fleet**  
Articulated lorry, length 13.6 m  
Truck with crane 14.5 m/500 kg and  
trailer  
Several pickups, service cars and stacker  
trucks

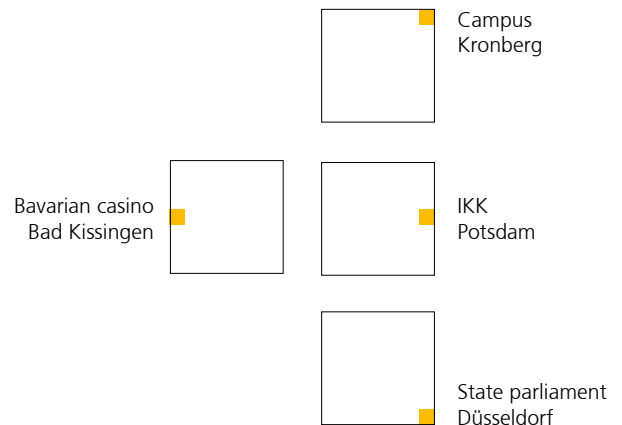

**Quality control**  
According to DIN EN ISO 9001:2000  
Comprehensive welding proof

## Metallic interior fittings

The interior works of a building are as well a big challenge for architects as the exterior works and an important business card for the house-owner or tenant, too. At the same time the appearance has to fulfil the requirements for the building technology – a balancing act which we at AMS have made it our business to find the right solutions together with the architects and the customers.

True to our motto: We realize the ideas and wishes of our customers by giving metal form and expression.

## Air pipe systems

Commercially used buildings have to be ventilated. Air systems are often integrated invisible or at least very simple. The architects with whom we work together look at this very differently. They consider the air pipe systems of a building not just as tubes which have to be hidden but as important design elements. We at AMS have made it our business to produce these design elements – optically outstanding, with solid function and of first-class quality.

Our air pipe towers are impressive without being threatening, elegant and clear but not cold. We adapt the form and the style of our air systems to the wishes of the architects and to the requirements of the individual project. Actually our air pipe systems are always a special and innovative eye-catcher and this makes us at AMS very proud of it.

## Metallic façades

The façades are the faces of buildings. They are eye-catchers and therefore the face work of a building is a decisive architectural feature element. Metal is the perfect material to realize any architectural idea being individually formable, durable and weather-resistant. In addition metal has a unique and precious look.

So metal can catch light and reflections and with this it gives an incomparable character to each building.

## Kitchen ventilation technology

In the gastronomic branch the innovative extraction hoods and kitchen ventilation ceilings by AMS are more than an insider tip. Why?

Our individually designed products meet all of our customers' demands: They are professionally made of high-quality metals only and are therefore solid, long-lived and easy to clean and to maintain. Each single detail is a piece of perfect craftsmanship. Besides: They look good.

## Service windows

Since the 1980s AMS has produced and installed thousands of service windows in fast-food restaurants, cash-desks, tollgates and porter's lodges. The AMS solution of the service windows offers a great variety of flexible and individual adaptations to the wishes of the customers: Many different sizes, one-piece or two-piece laminated insulating glass, stainless steel cover plate with shiftable heating, proximity switch, air curtain heating, membrane keyboard etc.

The reliable support of more than 20 years experience of our skilled workers makes the AMS competence complete.

## Industrial services

The products and performances of our comprehensive industrial services are aimed at the wishes and demands of our customers. Besides modern and high-efficient machinery on more than 8,000 sqm production area, each order is controlled and carried out by a team of qualified and experienced specialists. The AMS-quality-management-system conforms to DIN EN ISO 9001:2000.

In detail we offer you a complete solution for the following services:

- Edge parts
- Laser cuttings
- Nibble form parts
- Welding constructions
- Stainless steel glass bead blasting
- Tube and profile grinding
- Cone grinding
- Powder coating

## Plant components

In cooperation with a German engineer's office the AMS produces special housings for the purification of contaminated air and the treatment of odour emissions. The innovative methods for photo-ionisation and active oxygen developed by the engineers are professionally converted by AMS.

The plants are based on a modular system and are largely preassembled. In addition one of the remarkable features is their ease to use and maintain.

More than 150 reference plants have already been installed in Europe, the U.S.A., the United Arab Emirates and Australia.

## Furnishings + objects of art

We at AMS consider ourselves as a manufacturer specialized on metal-working. At first glance it may surprise that we have extended our portfolio to furnishings and objects of art. Furnishings do not only mean pieces of furniture but is rather a collective term for a multitude of objects and projects which combine two main designs according to the wishes and requirements of our customers.

It may be plausible that we produce metal furniture and accessories - however objects of art? Well, we just do what we are specialists in. Besides other aspects art and design are based on traditional craft. So any idea is welcome which can be realized by using high-quality metal. And we do a very good job in metal-working. Artists and designers contact us to help them making their visions come true with our experience and expertise in metal-working.

■ Metallic interior fittings

Panelling of elevator entrances, building supports, socle wainscoting, ceilings, soffits, lintels, walls, stairs

■ Air pipe systems

Air pipes, ventilating eyes, ventilating grids for walls and oblique roofs, air-conditioning pipes

■ Metallic façades

Coffer panelling, metal shingle roofs, atticas, wing roofs, advertisement columns and plates

■ Kitchen ventilation technology

Extraction and circulation hoods, ventilation ceilings and extraction beams, air outlets

■ Service windows

Fast-food restaurants, cash counters, keeper's lodges, toll counters

■ Industrial services

Edge parts, laser cuttings, nibbling form parts, welding constructions, powder coating, tube and profile grinding, glass bead blasting

■ Plant components

Hot-air curtain appliances, socle and wall source air outlets, special outlets

■ Furnishings + Objects of Art

Furniture, accessories, custom-made items, metal objects of art
